

## Virgin Media

# Case Study

### THE REQUIREMENT

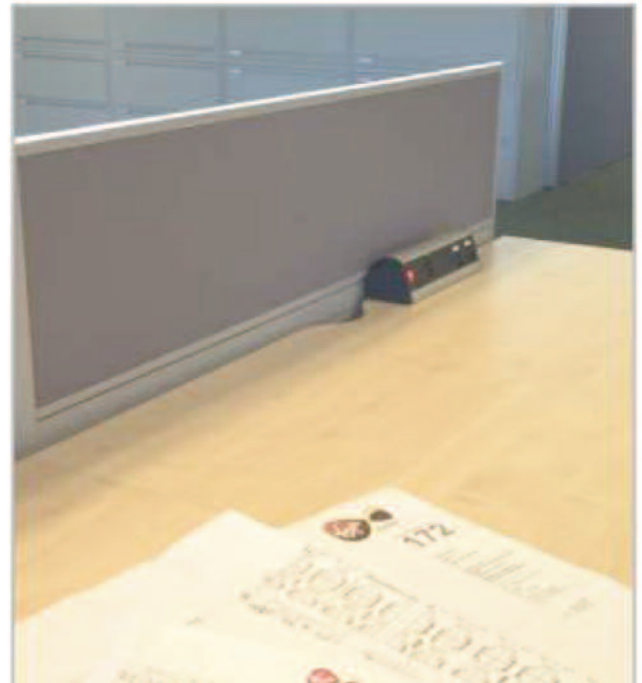

Virgin Media is the UK's leading entertainment and communications company. They provide a huge range of services to their customer base such as broadband, mobile phones and holidays to name but a few.

As a forward thinking company they implement strategies across the various companies to ensure the best possible working environments are created for their employees.

The existing office space and furniture were no longer suitable due to increased employee numbers and the level of communication now required between departments.

Virgin Media required the existing desks to be modified to suit new desk mount and floor standing screens and new bench desking to accommodate more flexible working areas for some employees.

Virgin Media selected Unique Office Solutions as the most suitable office furniture supplier, due to their manufacturing flexibility and willingness to work with the existing furniture in a mutually beneficial solution.

### THE SOLUTION

Unique suggested their bench system to Virgin Media due to its comprehensive cable management functionality and its flexible working abilities.

Virgin Media immediately selected the bench system to create the perfect communications area for multiple users.

Finished in a maple wood effect and silver frame work, to match existing desking. Desk mounted screens were used in conjunction with bench, supplied complete with tool rails, supplying desk top power and data connections.

All existing desk tops were removed and reworked to add cable management and make them suitable for the desk mounted and floor standing screens. Used throughout the office to define working space and create walkways, all screens were upholstered in matching fabric and finished with silver trim.

Desk tops and screens were installed quickly and efficiently ensuring minimum disruption to Virgin Media.
